

White Paper v1.2

01

Introduction

By creating whole DApps ecosystem, TRONbet* will revolutionize the way that developers adopt the blockchain ecosystem while keeping wealth redistribution at its core. ANTE will continue to be the centrepiece of the platform while developers will be able to utilize everything the TRONbet ecosystem has to offer. By taking behavioural mining to the next level, traditional apps will now have all the resources at their disposal to convert their apps to the TRON blockchain.

01

Introduction

Why TRON network?

Scalability – TRON’s network is capable of handling almost 2000 TPS (transactions per second), with the possibility of growing over time.

Transactions – TRON gives out 5000 bandwidth a day for users to conduct transactions. Users can also freeze TRX when bandwidth runs out. Smart contracts use energy for transactions, and TRON allows the option for developers to freeze their TRX to pay this on the user’s behalf.

01

Introduction

Why TRON network?

Coin burn and increase liquidity – TRON has a total of 100 billion supply for TRX tokens. Justin Sun, the founder of TRON recently announced a coin burn that adds an interesting twist. For example, if a third party wants to create token on the TRON network, they will have to burn 1000 TRX tokens. This will technically increase the price per TRX token.

Adoption – TRON has already hit major milestones such as 24-hour transaction number reached 1.4 million and more than 1.77 million wallets registered. Both these milestones were reached at a much quicker pace, giving TRON one of the highest if not the highest growth rates.

02

TRONbet Ecosystem

TRONbet will provide tools for DApp developers to utilize the TRONbet ecosystem. Developers can focus on their strengths, developing a premium DApp while TRONbet will take care of the rest. Users will be able to access all the premium DApps straight from the TRONbet portal, and can have the peace of mind that everything is safe and secure.

02

TRONbet Ecosystem

ANTE Token

ANTE token is to redistribute wealth to those who make this platform possible. 100% of all tokens earned from games are redistributed to all ANTE token holders proportionately. Only a 100,000,000 limited ANTE tokens will be minted, and this will never be increased.

ANTE Token Distribution

ANTE tokens can be mined just by playing TRONbet. Mining will have 10 stages with each stage having a total of 10,000,000 ANTE Tokens and further split into 10 levels with each level having 1,000,000 ANTE Tokens.

02

TRONbet Ecosystem

ANTE Token

Distribution of dividends will be in cryptocurrency and will happen without any work from the user making this an easy and safe process. Distribution happens daily giving users their proportional share of dividends automatically.

Share the wealth on TRONbet

ANTE token will be your share of the whole TRONbet platform with a portion of all revenue from all DApps being shared with the ANTE hodlers. Taking the Apple APP Store as an example, ANTE will be your share of the APP Store. ANTE hodlers will receive DApp specific TRC20 token according to the amount of ANTE token they hodl. Your dividends(TRX) will then be distributed according to the propotion of DApp token that you hodl.

Example of DApp Token Distribution

03

Ecosystem DApps

The TRONbet Ecosystem will include the following support:

SCAN/Profile

With the launch of SCAN on the current TRONbet platform, users have been able to check every single transaction that passes through the blockchain. We will expand this to support all DApps that take advantage of the new TRONbet platform. Users will be able to go through every transaction, dividends, amount of TRC20 tokens etc. across all TRONbet DApps

Exchange

TRONbet exchange gives users an easy and simple to use exchange, allowing them to freely trade tokens supported on the new TRONbet platform.

03

Ecosystem DApps

Wallet

A wallet developed and designed by the TRONbet team that can be used across all DApps supported on the new TRONbet platform. The wallet will continually be expanded to support different functions that different DApps will need to utilize. The wallet will also include a featured section to promote TRONbet DApps.

Mobile APP

The whole TRONbet platform will give users a standalone mobile experience unmatched by any other on the current market. The Mobile APP will include all functions that are available through the TRONbet platform Desktop experience.

03

Ecosystem DApps

Dev Portal

Developers that join the ecosystem will be able to sign up as a developer for the TRONbet platform, submit proposals for DApps, and will include all API information that is needed for developers to connect with the ecosystem.

TRONbet Platform Forum

A forum that will give users an open channel for the latest information, suggestions, and feedback. Giving a place for the community to come together to connect with developers.

Social Functions

With a revamped account system, the new TRONbet platform will include a new chat system, friend system, chat rooms, gift system and more.

04

How It Works

For Developers

TRONbet will develop a set of tools and APIs for developers to interact with, giving them a simple and secure way to utilize the TRON blockchain. The APIs will include TRC20 and TRC10 transactions, Dividend pools, mining system, social system, Decentralized Exchange, TRONbet Account System, TRONbet wallet, Mobile API and more. These set of tools will allow the experienced and non-experienced to easily transition to the TRON blockchain with the TRONbet team supporting them with a full backend system and smart contracts.

04

How It Works

For ANTE Hodlers

ANTE hodlers are the core of the TRONbet platform. Every DApp that connects to the TRONbet platform will be sharing a portion of their mining pool and dividend pool to ANTE hodlers. ANTE hodlers will also benefit just by hodling ANTE giving them a multiplier when they support other DApps in the ecosystem, giving ANTE added value.

04

How It Works

For Everyday Consumers

Consumers of DApps will continue to reap the rewards that TRONbet has to offer simply by using and supporting DApps within the platform. Similar to the current ANTE token, consumers will mine specific TRC20 tokens bound to each DApp and reap the rewards proportional to the amount of tokens that they hodl. Every token will be listed on the TRONbet DEX giving each token liquidity in the open market.

04

How It Works

For Advertisers

The TRONbet platform will be redesigned to include advertising options using a Cost per Milli or per banner/time basis. Advertisers will have the opportunity to tap into the greatest platform across all blockchains with tens of thousands of weekly users. All revenue from advertising will be shown transparently to all users with 100% being redistributed to all ANTE hodlers.

04

How It Works

Partner DApps

TRONbet team has developed several partnerships with outside developers to help them adapt to the TRONbet ecosystem. These DApps will be the first set of DApps that will be integrated into the TRONbet platform and will act as a trial to ensure that everything that the TRONbet ecosystem has to offer is smooth and secure before opening up to the wider community.

In-house DApps

The TRONbet team will continue to add new games to the original TRONbet platform. We will further expand our development team to release DApps that are developed by the TRONbet team to be added to the TRONbet platform.

04

How It Works

TRONbet Audit

Each DApp that submits a proposal to the TRONbet platform will be fully reviewed by the TRONbet Engineering team. Each DApp will be audited to ensure that it meets all the requirements set forth by the team which includes; a mining mechanism where wealth redistribution is returned to the users who support the DApp, security features to control risks from outside attacks, future roadmap and the ability to complete the roadmap to ensure users are protected from scams, team review including previous experience, overall quality of the DApp and its ability to benefit the whole ecosystem.

05

Roadmap

2019

Q1

- ANTE Buyback and Burn Event
- Integrate Partner TRC20 and TRC10 Tokens
- TRONbet Game #4
- TRONbet Game #5

Q2

- TRONbet v1.1
- TRONbet Wallet
- TRONbet DEX
- Partner DApp #1
- TRONbet.live

Q3

- TRONbet v1.2
- TRONbet Open API
- TRONbet Forum
- TRONbet Mobile App
- Partner DApp #2

Q4

- TRONbet Completed Platform
